Developmental Disabilities

An individual is considered to have intellectual and developmental disabilities based on the following three criteria: intellectual functioning level (IQ) is below 70-75; significant limitations exist in two or more adaptive skill areas; and the condition is present from childhood (defined as age 18 or less) (AAMR, 1992).

*Agency for Persons with
Disabilities Introduction to
...*

A developmental disability is a disability that may affect physical, cognitive, learning, language, or behavioral development (CDC, 2015c). This means that there may be a developmental delay in normal development (how a person grows and functions) or an impairment of functioning (the person may not be able to function according to normal developmental processes).

Developmental Disabilities

Introduction To A Diverse Field
a diverse group of chronic conditions that are due to mental or physical impairments that arise before adulthood.

Developmental disabilities cause individuals living with them many difficulties in certain areas of life, especially in "language, mobility, learning, self-help, and independent living".
