Eye of the Albatross: Visions of Hope and Survival by Carl Safina (Holt McDougal 2003)(598.42). This is a very well done look at the health of our oceans and the creatures that depend on the sea for habitat and survival. My rating 7.5, finished 2004. I reread this 9/23/16 and downgraded it to 7/10.

The story of an ancient sea turtle and what its survival says about our future, from the award-winning writer and naturalist

Get Free Eye Of The Albatross Visions Of Hope And Survival

indifferent to the struggles of her creatures, the human effect on them is often premeditated. The distressing decline of sea turtles in Pacific waters and their surprising recovery in the Atlantic illuminate what can go both wrong and right from our interventions, and teach us the lessons that can be applied to restore health to the world's oceans and its creatures. As *Voyage of the Turtle*, Carl Safina's compelling natural history adventure makes clear, the fate of the astonishing leatherback turtle, whose ancestry can be traced back 125 million years, is in our hands. Writing with verve and color, Safina describes how he and his colleagues track giant pelagic turtles across the world's oceans and onto

Get Free Eye Of The Albatross Visions Of Hope And Survival

remote beaches of every continent. As scientists apply lessons learned in the Atlantic and Caribbean to other endangered seas, Safina follows leatherback migrations, including a thrilling journey from Monterey, California, to nesting grounds on the most remote beaches of Papua, New Guinea. The only surviving species of its genus, family, and suborder, the leatherback is an evolutionary marvel: a "reptile" that behaves like a warm-blooded dinosaur, an ocean animal able to withstand colder water than most fishes and dive deeper than any whale. In his peerless prose, Safina captures the delicate interaction between these gentle giants and the humans who are finally playing a significant role in their survival.

"Magnificent . . . A joyful, hopeful book. Safina gives us ample reasons to be enthralled by this astonishing ancient animal—and ample reasons to care." -- The Los Angeles Times

Part odyssey, part pilgrimage, this epic personal narrative follows the author's exploration of coasts, islands, reefs, and the sea's abyssal depths. Scientist and fisherman Carl Safina takes readers on a global journey of discovery, probing for truth about the world's changing seas, deftly weaving adventure, science, and political analysis.

Looks at what is known about the albatross, a bird of

Get Free Eye Of The Albatross Visions Of Hope And Survival

legend and poetry, and examines the conditions that are threatening over three-quarters of all albatross species with extinction.

An exhilarating journey of natural renewal through a year with MacArthur fellow Carl Safina Beginning in his kayak in his home waters of eastern Long Island, Carl Safina's *The View from Lazy Point* takes us through the four seasons to the four points of the compass, from the high Arctic south to Antarctica, across the warm belly of the tropics from the Caribbean to the west Pacific, then home again. We meet Eskimos whose way of life is melting away, explore a secret global seed vault hidden above the

Get Free Eye Of The Albatross Visions Of Hope And Survival

Arctic Circle, investigate dilemmas facing foraging bears and breeding penguins, and sail to formerly devastated reefs that are resurrecting as fish graze the corals algae-free. "Each time science tightens a coil in the slack of our understanding," Safina writes, "it elaborates its fundamental discovery: connection." He shows how problems of the environment drive very real matters of human justice, well-being, and our prospects for peace. In Safina's hands, nature's continuous renewal points toward our future. His lively stories grant new insights into how our world is changing, and what our response ought to be.

A NEW YORK TIMES NOTABLE BOOK OF 2020 "In this superbly articulate cri de coeur, Safina gives us a new way of looking at the natural world that is radically different."—The Washington Post New York Times bestselling author Carl Safina brings readers close to three non-human cultures—what they do, why they do it, and how life is for them. A New York Times Notable Books of 2020 Some believe that culture is strictly a human phenomenon. But this book reveals cultures of other-than-human beings in some of Earth's remaining wild places. It shows how if you're a sperm whale, a scarlet macaw, or a chimpanzee, you too come to understand yourself as an individual

Get Free Eye Of The Albatross Visions Of Hope And Survival

within a particular community that does things in specific ways, that has traditions. Alongside genes, culture is a second form of inheritance, passed through generations as pools of learned knowledge. As situations change, social learning—culture—allows behaviors to adjust much faster than genes can adapt. *Becoming Wild* brings readers into intimate proximity with various nonhuman individuals in their free-living communities. It presents a revelatory account of how animals function beyond our usual view. Safina shows that for non-humans and humans alike, culture comprises the answers to the question, “How do we live here?” It unites individuals within a group identity. But cultural groups often seek to

Get Free Eye Of The Albatross Visions Of Hope And Survival

avoid, or even be hostile toward, other factions. By showing that this is true across species, Safina illuminates why human cultural tensions remain maddeningly intractable despite the arbitrariness of many of our differences. *Becoming Wild* takes readers behind the curtain of life on Earth, to witness from a new vantage point the most world-saving of perceptions: how we are all connected.

When populations of striped bass began plummeting in the early 1980s, author and fisherman Dick Russell was there to lead an Atlantic coast conservation campaign that resulted in one of the most remarkable wildlife comebacks in the history of fisheries. As any

Get Free Eye Of The Albatross Visions Of Hope And Survival

avid fisherman will tell you, the striped bass has long been a favorite at the American dinner table; in fact, we've been feasting on the fish from the time of the Pilgrims. By 1980 that feasting had turned to overfishing by commercial fishing interests. Striper Wars is Dick Russell's inspiring account of the people and events responsible for the successful preservation of one of America's favorite fish and of what has happened since. Striper Wars is a tale replete with heroes--and some villains--as the struggle to save the striper migrated down the coast from Massachusetts to Maryland. Russell introduces us to a postman at arms against a burly trap-net fisherman, a renowned state governor caving to

Get Free Eye Of The Albatross Visions Of Hope And Survival

special interests, and a fishing-tackle maker fighting alongside marine biologists. And he describes how champions of this singular fish blocked power plants and New York's Westway Project that would otherwise compromise its habitat. Unfortunately, those who cheered the triumphant ending to the campaign, as the coastal states enacted measures that enabled the striped bass to make its comeback, have found the peace transitory--there is now a new enemy emerging on the front. In recent years a chronic bacterial disease has struck more than seventy percent of the striped bass population in the primary spawning waters of the Chesapeake Bay. Malnutrition seems to be a significant factor, brought on by the same

Get Free Eye Of The Albatross Visions Of Hope And Survival

overfishing that plagued the bass in the first battle--only this time, the overfishing is devastating menhaden, the silvery little fish upon which the bass feed. Lessons learned during the first conservation battle are being applied here, highlighting a need for a whole new ecosystem-based approach to conserving species. Only with constant vigilance by concerned citizens, Dick Russell reminds us, can environmental victories be sustained. This particular fish story is a personal one for him, and he follows the striper's saga today all the way to California, where the fish was introduced in 1879 and where agribusiness now threatens its future. For his conservation work during the 1980s Russell received

Get Free Eye Of The Albatross Visions Of Hope And Survival

a citizen's Chevron Conservation Award.
