The US government is pouring billions into Covid-19 vaccines, and candidates from three companies are moving along quickly: Moderna, Pfizer and Novavax.

These 3 Covid-19 vaccines have been in the news. Here's ...

I've just come across this phrase. What puzzles me is the use of "out" or "in". Until now, I knew only the phrase "from here on" that means the same as "from now on", but what about the "out/in" after that? How will the meaning change if I omit it? What's the difference between these two if there actually is any? From here on, I'm going to pay more attention.

[Vocabulary] from here on out/in

A wise and insightful exploration of human navigation, what it means to be lost, and how we find our way. How is it that we can walk unfamiliar streets while maintaining a sense of direction? Come up with shortcuts on the fly, in places we've never traveled? The answer is the complex mental map in our brains. This feature of our cognition is easily taken for granted, but it's also critical to our species' evolutionary success. In *From Here to There* Michael Bond tells stories of the lost and found—Polynesian sailors, orienteering champions, early aviators—and surveys the science of human navigation. Navigation skills are deeply embedded in our biology. The ability to find our way over large distances in prehistoric times gave *Homo sapiens* an advantage, allowing us to explore the farthest regions of the planet. Wayfinding also shaped vital cognitive functions outside the realm of navigation, including abstract thinking, imagination, and memory. Bond brings a reporter's curiosity and nose for narrative to the latest research from psychologists, neuroscientists, animal behaviorists, and anthropologists. He also turns to the people who design and expertly maneuver the world we navigate: search-and-rescue volunteers, cartographers, ordnance mappers, urban planners, and more. The result is a global expedition that furthers our understanding of human orienting in the natural and built environments. A beguiling mix of storytelling and science, *From Here to There* covers the full spectrum of human navigation and spatial understanding. In an age of GPS and Google Maps, Bond urges us to exercise our evolved navigation skills and reap the surprising cognitive rewards.

The definitive firsthand account of the groundbreaking research of Philip Zimbardo—the basis for the award-winning film *The Stanford Prison Experiment*—Renowned social psychologist and creator of the Stanford Prison Experiment Philip Zimbardo explores the mechanisms that make good people do bad things, how moral people can be seduced into acting immorally, and what this says about the line separating good from evil. *The Lucifer Effect* explains how—and the myriad reasons why—we are all susceptible to the lure of “the dark side.” Drawing on examples from history as well as his own trailblazing research, Zimbardo details how situational forces and group dynamics can work in concert to make monsters out of decent men and women. Here, for the first time and in detail, Zimbardo tells the full story of the Stanford Prison Experiment, the landmark study in which a group of college-student volunteers was randomly divided into “guards” and “inmates” and then placed in a mock prison environment. Within a week the study was abandoned, as ordinary college students were transformed into either brutal, sadistic guards or emotionally broken prisoners. By illuminating the psychological causes behind such disturbing metamorphoses, Zimbardo enables us to better understand a variety of harrowing phenomena, from corporate malfeasance to organized genocide to how once upstanding American soldiers came to abuse and torture Iraqi detainees in Abu Ghraib. He replaces the long-held notion of the “bad apple” with that of the “bad barrel”—the idea that the social setting and the system contaminate the individual, rather than the other way around. This is a book that dares to hold a mirror up to mankind, showing us that we might not be who we think we are. While forcing us to reexamine what we are capable of doing when caught up in the crucible of behavioral dynamics, though, Zimbardo also offers hope. We are capable of resisting evil, he argues, and can even teach ourselves to act heroically. Like Hannah Arendt's *Eichmann in Jerusalem* and Steven Pinker's *The Blank Slate*, *The Lucifer Effect* is a shocking, engrossing study that will change the way we view human behavior. Praise for *The Lucifer Effect* “The Lucifer Effect will change forever the way you think about why we behave the way we do—and, in particular, about the human potential for evil. This is a disturbing book, but one that has never been more necessary.”—Malcolm Gladwell “An important book . . . All politicians and social commentators . . . should read this.”—*The Times* (London) “Powerful . . . an extraordinarily valuable addition to the literature of the psychology of violence or ‘evil.’”—*The American Prospect* “Penetrating . . . Combining a dense but readable and often engrossing exposition of social psychology research with an impassioned moral seriousness, Zimbardo challenges readers to look beyond glib denunciations of evil-doers and ponder our collective responsibility for the world's ills.”—*Publishers Weekly* “A sprawling discussion . . . Zimbardo couples a thorough narrative of the Stanford Prison Experiment with an analysis of the social dynamics of the Abu Ghraib prison in Iraq.”—*Booklist* “Zimbardo bottled evil in a laboratory. The lessons he learned show us our dark nature but also fill us with hope if we heed their counsel. *The Lucifer Effect* reads like a novel.”—Anthony Pratkanis, Ph.D., professor emeritus of psychology, University of California
