Chapter 5: Ladder and Functional Block Programming ...

Let's take a look at what we now know. Ladder logic has been around for a long time and has been the universal programming language for PLCs. Function block programming has been steadily gaining popularity in the PLC

Functional block diagram. Just like LD, FBD is visual and intuitive for those with an electrical background. For those used to Boolean expressions and digital systems, FBD will feel more intuitive than ladder. It too resembles a wiring diagram. However, here we “wire” blocks together, while LD has more of a relays logic.
