alternators is similar to "ACR" type, except that a voltage regulator of micro-circuit construction is incorporated as integral part of the "ACR" alternator. "AC" type alternators use an external regulator. Both type alternators have stators consisting of three-phase, star-connected windings on a ring end cover and drive end bracket. The rotor is of eight or ...

30 years ago service and parts will be very difficult to find. The original alternators fitted to most British marine/marinised engines from the late 1960s were the Lucas 10AC or 11AC, the 11AC having a higher output. These alternators used external voltage regulators, energising relays, and warning lamp controls. Many used a "rising oil pressure ...
