Evolution of the world wide web. The web has changed a lot since it was first created. The first websites were made up of simple pages of just words and pictures, a bit like online books or magazines.

**What is the world wide web? - BBC Bitesize**

The early web community produced some revolutionary ideas that are now spreading far beyond the technology sector: Decentralisation: No permission is needed from a central authority to post anything on the web, there is no central controlling node, and so no single point of failure ... and no "kill switch"!

**History of the Web – World Wide Web Foundation**

If you can connect to the Internet, but no web pages open when connected, follow the steps below. Ping an Internet address. Open the Command Prompt. At the prompt, type ping google.com and press Enter. No response from google.com. If you do not receive a response, try pinging the google.com IP address by typing the command ping 8.8.8.8 at the prompt.

**Why can't I open any web pages when connected to the Internet?**

When there is no author for a web page, the title moves to the first position of the reference entry: Example: All 33 Chile miners freed in flawless rescue.

Core Web Vitals are a set of field metrics that measure important aspects of real-world user experience on the web. Core Web Vitals includes metrics, as well as target thresholds for each metric, which help developers qualitatively understand whether the experience of their site is "good", "needs improvement", or is "poor".

**Defining the Core Web Vitals metrics thresholds**

Directed by Michael Gordon. With Ella Raines, Edmond O'Brien, William Bendix, Vincent Price. An attorney acting as a body guard, apparently kills a man in defense of his employer's life, and later believes the victim was set up to be murdered.

A web browser (commonly referred to as a browser) is a software user agent for accessing information on the World Wide Web. To connect to a website's server and display its pages, a user needs to have a web browser program. This is the program that the user runs to download, format and display a web page on the user's computer.
